UMA SRINIVAS

Senior Software Engineer

+1(832) 3569869 | umasrinivas9k@gmail.com | https://www.linkedin.com/in/umasrinivas-kattula

SUMMARY

Full Stack Engineer with 8 years of experience in designing and developing web and cloud-based applications. Skilled in analysis, architecture, development, implementation, and testing of software solutions across web, cloud, and desktop environments. Committed to driving innovation, optimizing performance, and delivering high-quality solutions that meet business objectives.

PROFESSIONAL SKILLS

Fronted Technologies : HTML5, CSS, SCSS, Boot Strap, JavaScript, TypeScript, ES8, React.js, Storybook, Recoil, Redux, Redux Saga, Redux ToolKit, Angular, Next.js, Jest, Enzyme, Gatsby, Webpack

Backend Technologies : Node.js, Express.js, Java, Spring Boot, JPA, Socket.IO, Python, JWT, OAuth, SSO, SQL, PostgreSQL, Oracle, MongoDB, NoSQL, RabbitMQ, Elastic Search

AI/ML : Rasa NLU, Microsoft Bot Framework

Tools : Elastic Search, Jira, Confluence, Azure Devops

DevOps : Docker, Dynatrace, Jenkins, Kubernetes, Camunda BPMN, NPM, Git, AWS

Operating System : Windows, Linux

WORK EXPERIENCE

Walmart Inc — Mar 2025 – Till Now

TrafficSense UI - Software Engineer III

- Led the creation of a custom data analytics dashboard to replace Adobe Analytics, enhancing data control and eliminating external licensing costs.
- Involved in cross-functional collaboration between engineering and product teams to define analytics KPIs, dashboards, and feature rollouts.
- Architected complex React workflows with advanced patterns (Context API, Redux, and Custom Hooks), enabling scalable state management and real-time UI updates across data-intensive modules.
- Developed reusable, accessible components in Storybook and managed them in shared repositories, while enhancing responsiveness with Bootstrap and media queries to ensure a seamless multi-device experience.
- Improved front-end performance and responsiveness by implementing layout effects, debouncing, memorization, lazy loading, and API response caching, while optimizing data flow for high-volume charts using efficient state management and conditional rendering.
- Integrated AG Grid and AMCharts for dynamic, enterprise-grade data visualizations and reporting features with filtering, and export functionalities.
- Integrated an in-house chatbot package into the React dashboard, resolving TypeScript module interoperability and Axios-based communication issues using Webpack overrides and custom module resolution, ensuring seamless functionality and maintainable integration.
- Built and secured RESTful APIs using Spring Boot and Java, incorporating JWT token validation and Single Sign-On (SSO) with login forms aligned with enterprise authentication standards.
- Collaborated with data engineers to design and implement complex SQL and aggregation queries, and optimized APIs to improve performance, reducing dashboard load times by 40–60% and enhancing data accuracy across business units.
- Utilized Project Lombok to streamline the creation of Data Transfer Objects (DTOs), reducing boilerplate code and improving development efficiency across backend services.
- Achieved over 90%-unit test coverage across the codebase with robust testing frameworks, including Jest, React Testing Library, JUnit, and JaCoCo.
- Handled CI/CD pipelines, ensuring smooth delivery cycles and minimizing deployment issues by following Agile workflows such as Scrum and Kanban.methodologies.

NRG Energy — Sep 2023 – Feb 2025

Direct Energy Texas - Programmer Analyst III

- Delivered mobile-responsive & accessible web application for enrollment and account management of customer's electricity subscriptions by aligning with cross-functional and cross-brand requirements.
- Led the design and development in Agile methodologies enabling users to manage profiles, electricity plans, TOS & EFL, utilization, and payments
- Architected reusable, scalable UI components using React.js, TypeScript, and React Hooks, streamlining development and consistency across applications.
- Ensured web accessibility compliance (WCAG) across all pages using storybook add-on-ally with Internalization support using i18next.
- Introduced Formik with Yup for robust form validation, improving user input handling efficiency.
- Developed reverse proxies using Node.js & Express.js and created Restful Web APIs using Java, Spring boot to access data from 3rd party services.
- Leveraged Redux Toolkit and AWS Cognito for secure authentication and efficient REST API data fetching.
- Troubleshooted critical cross-platform issues, maintaining a consistent user experience across devices.
- Incorporated Adobe Analytics to track user behavior, enabling data-driven UX optimizations.
- Achieved front-end responsiveness using SCSS, Bootstrap, and media queries, delivering multi-device experience.
- Added secure server side [SSR] JSP pages in Spring with JPA for agent-driven enrollments and payment processing, ensuring PCA compliance.
- Improved unit test coverage to over 80% using Jest and React Testing Library, ensuring reliability of application.
- Automated CI/CD pipeline with Jenkins, maintaining zero vulnerabilities with SonarQube and reducing deployment errors by 30% by following scrum or kanban methodologies.

Ivy Software Development Services Pvt Ltd — Apr 2021 – Apr 2023

Omnia - Software Engineer

- Developed a high-performance back-office gambling application using, React.js, Electron.js, and a Micro Frontend architecture, enabling shop colleagues to manage bets, process payouts, and generate slips efficiently.
- Implemented concurrent transaction workflows using Redux Sagas to coordinate external betting service calls and internal backend updates with transaction IDs, and integrated Electron-based print services to automatically generate betting slips upon confirmation
- Embedded third-party betting interfaces via iframes and implemented event listener communication to capture bet events, store transaction details in the backend, and redirect users to payout workflows.
- Planned and implemented real-time notifications using Socket.IO for instant updates on bet transactions and terminal events, improving operational transparency and response times.
- Migrated legacy Angular modules and refactored class-based React components to reusable functional components, standardizing central artifacts for maintainability and scalability.
- Achieved 90% test coverage through Jest unit and integration tests and automated deployment workflows using AWS, Jenkins, and CI/CD pipelines, enhancing system reliability, accelerating delivery cycles, and ensuring compliance and operational integrity.

Digitamize Innovation pvt ltd — Feb 2019 – Apr 2021

Chatbot Low-code Platform - Product Engineer

- Led and Managed the team in development of a low-code Chatbot Platform, delivering customizable NLP-based solutions with Camunda BPMN for conversational flow automation.
- Built secure, scalable REST APIs using Node.js and Express.js, adhering to OWASP guidelines and optimizing performance for microservices architecture ensuring scalability & performance.
- Implemented robust authentication and authorization mechanisms for REST APIs by integrating LDAP and OAuth with Keycloak SSO, enabling CORS and enforcing security policies to safeguard each request
- Made Chatbot product using Microsoft Bot Framework and Improved its usability by integrating Elasticsearch for auto-suggestions and related queries.
- Led and Conducted knowledge transfer sessions on NLP training and Camunda BPMN dialogue flows to ensure team alignment and collaboration.
- Engineered Event driven and Web Socket mechanisms to optimize live data synchronization for critical operations.
- Enhanced the NLP Trainer dashboard using python and RabbitMQ to manage queuing mechanisms and spawn containers for training live logs.
- Use PM2 and cluster modules of Nodejs and efficiently Utilized worker threads to offload CPU-intensive tasks, improving main thread responsiveness.
- Developed and optimized Webpack configurations to reduce bundle sizes, and regularly utilized Linux CLI and shell scripts for automation, environment setup, and build/deployment processes, ensuring seamless SaaS release compatibility.
- Dockerized 9 microservices and configured NGINX as a reverse proxy with SSL termination and security headers to fortify application security, and resolved vulnerabilities identified by the Nessus scanner

Fortunapix Pvt Ltd — Jan 2018 – Apr 2019

LernBook - Associate Software Engineer

- Contributed to innovative client solutions by developing proof-of-concept and documenting findings in using Ontologies for Book resources.
- Assisted & Collaborated with the team to utilize JavaScript tools for extracting PDF content and generating digital books with Apache POI library.
- Implemented REST APIs and core services from business process using Java, Spring boot, and MongoDB, enabling CRUD operations for digital book managent and user controls
- Automated content ingestion to store hierarchical book data in MongoDB and assets in AWS cloud S3, reducing manual processing time by 90%.
- Assisted developers by revising JSON structures and RESTful APIs to provision precise data based on requirements.
- Deployed a modular, Kubernetes-based architecture, enabling resource allocation and cost efficiency.
- Incorporated offline book access into a mobile app built with Ionic and Angular, preloading books for remote access.

EDUCATION

Bachelors of Technology – Electrical and Electronics Engineering, Andhra University, 2017

CERTIFICATIONS

- **AWS Certified Developer Associate**
- **Apollo Certified GraphQL Developer**

Recommendations

Romil Shah – Staff Product Manager, Nayara Energy (Client)
"The efforts Uma put into delivering high-quality work for Nayara Energy Limited is commendable. May you continue the same for every single day for the rest of your career. Kudos!"

Amol Gholap – Senior Technical Manager, Walmart
"I've had the pleasure of working with Uma, and it's rare to come across a developer who demonstrates such strong ownership and reliability so early on. Uma quickly became a key contributor, consistently ensuring feature rollouts were delivered smoothly and on time. His proactive approach and accountability at every stage played a crucial role in helping us meet aggressive deadlines without compromising on quality. What truly sets Uma apart—beyond his solid technical skills—is his positive attitude and collaborative spirit. He brings energy and focus to every task and works seamlessly with cross-functional teams. Uma is a tremendous asset, and any team would be lucky to have him on board"
